NUMBER OF CYLINDERS
e.g. 4

WHEEL DRIVE SYSTEM
FWD / RWD / AWD / 4WD

TURBO
Yes / No

Number of owners has no dedicated field in the Edit Car form. If you fill it in here, type it into the Description box (section C) so the buyer still sees it.

C Description and features

This is the text the buyer reads on the QR page

STANDARD FEATURES (TICK WHAT APPLIES)

☐ Air conditioning ☐ Climate control ☐ Sunroof ☐ Leather seats
☐ Heated seats ☐ Reverse camera ☐ Parking sensors ☐ Navigation
☐ Bluetooth ☐ Apple CarPlay ☐ Android Auto ☐ Multimedia screen
☐ LED headlights ☐ Fog lights ☐ Alloy wheels ☐ Power windows
☐ Cruise control ☐ Adaptive cruise ☐ Lane keep assist ☐ Blind spot alert
☐ Keyless entry ☐ Push start ☐ Alarm ☐ Service history

DESCRIPTION
Condition - engine - interior - safety - exterior - service history - reason for sale. Write like a salesperson, not a mechanic.

Do not use commas if you plan to add this vehicle by CSV bulk import - the importer splits rows on commas and shifts the columns. Use " - " or " ; " instead. Example: "Excellent condition - sunroof - leather seats - reverse camera - 1 owner - full service history."

D Contact

How the buyer reaches the showroom

PHONE
e.g. 0770 123 4567

WHATSAPP
e.g. 009647701234567

EMAIL
e.g. sales@showroom.com

VIDEO LINK
optional

The form automatically strips a leading **00** from the WhatsApp number so the wa.me link works. Enter it in international format and let the form handle the rest.

H Sign-off

Confirms the details above are accurate

COMPLETED BY (NAME)	ROLE	DATE	DEALER REFERENCE / STOCK NO.

DEALER SIGNATURE	CAR QR SHOWCASE USE ONLY - VEHICLE ID

WHAT HAPPENS AFTER YOU SUBMIT THIS SHEET

1. Car QR Showcase enters the details into the Edit Car form and generates the QR code.
2. You approve the QR preview, print the sticker and fix it to the windshield.
3. The dealer watches scans and enquiries arrive on the dashboard.
4. The QR URL can be changed at any time from one settings field - every sticker already printed keeps working.

I How to use this sheet

The operator's side

1. **Collect.** Hand this sheet to the dealer - or fill it in with them - for every vehicle that is getting a QR code. One sheet per vehicle.
2. **Check.** Make and Model are filled in, the Description box actually lists the features, and photos are supplied.
3. **Enter.** Admin panel - Cars - Add Car - paste each value into the matching field in the Edit Car form. Section J is the field-by-field map.
4. **Print the QR.** In the same form pick the QR template, frame and shape, then print the sticker and fix it to the windshield.
5. **Batch alternative.** Fill the Intake Ledger spreadsheet instead, then use Cars - Bulk Import and upload it as a CSV. One file per dealer.

K Traps to avoid

Check these before you save

Make and Model are the only hard blocks

The form refuses to save without both. Everything else can be empty and added later.

There is no separate features field

The customer page renders Description, fuel type, colour, mileage, price, photos, the specifications and the contact details. Features written anywhere else are invisible - put them in Description (section C).

Do not use commas in Description or Location

The CSV bulk importer splits rows on commas, so one comma shifts every column after it. Use ' - ' or ' ; '. The Edit Car form is not affected.

WhatsApp formatting

The form strips a leading 00 and a single leading 0 on long numbers. Enter 009647701234567 and it is stored correctly.

Set Make before Model

Changing the Make clears the Model. Enter them in the wrong order and you lose the model.

Number of owners is the only leftover in Description

Engine, horsepower and condition now have their own fields. Owners does not - put it in Description.

One company per bulk import

The importer assigns every row to the company chosen in step 2. Split the file if the vehicles belong to different dealers.

Photos are the product

A vehicle with no photos still scans, but it will not sell. Six good photos is the practical minimum for a dealer listing.
